DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-8, 11 are drawn to bridge or gateway between networks, classified in class 370, subclass 401.
- II. Claims 9, 12 are drawn to circuit switching networks, classified in class 370, subclass 357.

The inventions are distinct, each from the other because of the following reasons: Group I relates to a system for interconnecting telephones and computers. The systems acts like a bridge between two networks. Group II deals with transmitting call for DSO channels through a PSTN, which is a circuit switching network.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
